Local Dealer:

The **FD 2006IL AutoSeal® System** allows operators to **print, fold and seal** pressure-sensitive one-piece mailers in one step, **reducing processing time and increasing document security**. The IL System works in-line with model-specific MICR and non-MICR desktop laser printers. Its **fully-enclosed paper path** is designed to conceal confidential documents, including PIN notices, checks, school grade reports and health care information. Standard features include a **color touchscreen control panel**, and **clearly marked fold plates**, and an **alignment base** which joins the FD 2006IL with the laser printer for accurate feeding. **Built in the USA** with proven Formax technology, it's ideal for processing sensitive and confidential documents.

Color Touchscreen Control Panel
Graphics-based and designed for easy, walk-up use

Fully Enclosed Paper Path
Provides document security from printer to pressure sealer

Easy to Adjust Fold Plates
Clearly marked and easy to adjust for popular and custom folds

Adjustable Catch Tray
Accommodates any fold type, stacks forms neatly and sequentially

Insulated Fold Plates
Top, side covers, and fold plates are insulated to reduce noise
